## **Produce Traceability Initiative Commodity and Variant Codes for Use With Data Synchronization Template**

Use the following codes to identify units of measure when customizing the PTI-provided Data Synchronization Template to create your company’s specific Data Synchronization Spreadsheet.

The PTI Master Data Work Group has provided guidance as to codes which should be used when populating the Commodity and Variant attributes when using the PTI-provided Data Synchronization Template to create your company’s specific Data Synchronization Spreadsheet. The guidance provides simple to use codes which are common for all produce so as to ensure the best utilization of these attributes.

For the Commodity attribute, it is recommended to use the Global Product Classification (GPC) name at the Brick level. This is the main Classification level for an item in the GPC system. The codes are listed in the table below. While this list is provided, the most current list can be found by visiting the GPC website at <http://www.gs1.org/gsmc/kc/gpc>.

For the Variant Attribute, it is recommended to use the Price Lookup (PLU) name. Those codes are listed at [www.plucodes.com](http://www.plucodes.com).

*Source: GS1 GPC; current as of December 2011.*

<b>GPC Brick Code</b>	<b>GPC Brick Name</b>
10006043	American Basil
10005948	American Persimmon
10006174	Ananas
10005895	Apple Bananas
10006063	Apple Mint
10005900	Apples
10005905	Apricots
